

Panoramic views of Central Park and the City skyline are the backdrop to this expansive five-room retreat. The living and dining area, gourmet kitchen, study, bedroom and master bath are elegantly adorned with oriental-inspired artifacts in a contemporary design that is quintessentially New York.

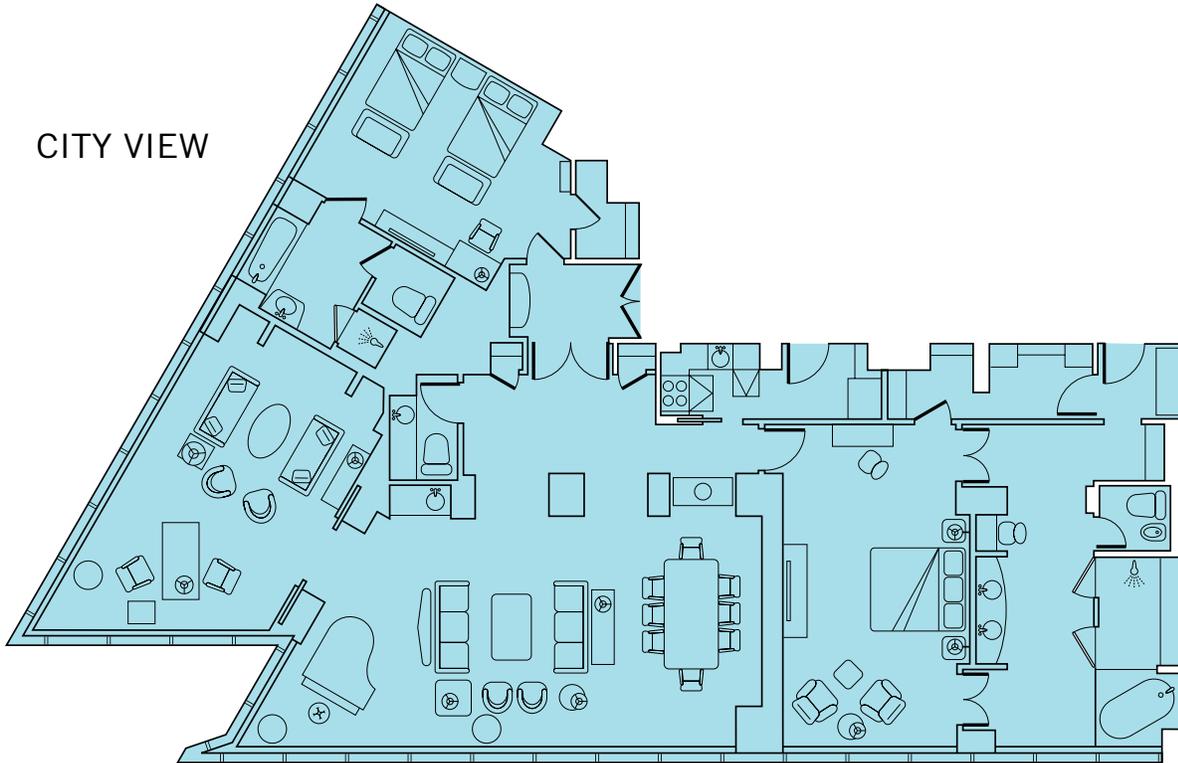

Mozambique wood-paneling is carried throughout the space and creates a rich, earthy feeling. The dark-toned furniture is accented with shades of red and brushed gold to create a space that is elegant, soothing and stylish. The walls of the master bedroom are upholstered with silk, and a spacious walk-in closet is paneled with sycamore. The master bath, outfitted with honey onyx walls, features separate over-sized soaking tub and glass-enclosed steam & shower for two.
